EDUCATION

Lovely Professional University

Aug 2024 – Jul 2026

Master of Science in Data Science

CGPA: 8.24/10.00

- **Relevant Coursework:** Advanced Data Science, Artificial Intelligence, Business Intelligence, Advanced Databases, Data Warehousing & Mining, Statistical Foundation, NoSQL Databases
- **Certifications:** IBM Certified: ML  BI , Data Science , Data Fundamentals , Data Visualization 

Lovely Professional University

Aug 2021 – Jul 2024

Bachelor of Science in Information Technology

CGPA: 7.57/10.00

- **Relevant Coursework:** Data Structures, DBMS, Information Storage, Computer Networks & Security
- **Certifications:** Big Data , Software Engineering 

EXPERIENCE

US MedRev Solutions

Aug 2026 – Present

Growth Operations Analyst

Remote

- Leveraged AI-driven research workflows to accelerate data scraping and collection, compiling a structured prospect dataset of **100+** U.S. medical practitioners.
- Cleaned and validated clinical data in Microsoft Excel and Google Sheets, improving data analysis and usability.
- Engineered and deployed an interactive website using HTML5, JavaScript, and Bootstrap, configuring hosting infrastructure.
- Monitored and automated website performance, DNS, SSL/TLS infrastructure, and analytics using Cloudflare and cPanel, saving **10+ hours/week**.

PROJECTS

AI-Powered Tax Compliance Monitoring System - SIH | Scikit-learn, XGBoost, PySpark May 2026

- Analyzed **500K+** financial transactions to build an AI-powered tax fraud detection and risk monitoring system.
- Led a team, engineered **27** data features, and optimized machine learning classification models to enhance anomalous behavior detection.
- Achieved **88%** accuracy in identifying high-risk taxpayers through advanced predictive modeling.
- Developed a scalable analytics pipeline using **PySpark** for distributed data processing and an interactive Streamlit dashboard with **7** analytical views, KPIs, tables, and graphs for real-time compliance monitoring.

RAG-Powered Document Q&A System | FastAPI, Endee Vector DB, OpenAI, Pytest May 2026

- Developed an end-to-end RAG pipeline for document question answering using semantic vector search.
- Built an end-to-end ingestion pipeline for chunking, embedding, indexing, and retrieving document passages using **all-MiniLM-L6-v2** embeddings and Endee vector database.
- Implemented Approximate Nearest Neighbour (ANN) retrieval with cosine similarity search for efficient top-K semantic document retrieval.
- Designed REST APIs using **FastAPI** for document ingestion, querying, and interactive chat workflows with OpenAPI documentation support.

Social Media Toxic Comment Detection | TensorFlow, Scikit-learn, Gradio Mar 2025

- Developed a multilabel text classification model to identify and categorize online comments into six distinct categories: toxic, severe toxic, obscene, threat, insult, and identity hate.
- Engineered a robust NLP pipeline involving text cleaning, tokenization, and TF-IDF vectorization to transform unstructured social media data into machine-readable features.
- Optimized model performance by evaluating multiple machine learning algorithms, achieving a precision of **89%** and recall of **81%** to ensure accurate content moderation and minimize false positives.

SKILLS

Programming: Python, SQL, JavaScript, HTML/CSS

Tools & Technologies: Git, Watson Studio, RapidMiner, AWS, MongoDB, MySQL, Power BI

Frameworks: REST APIs, Vector DB, Django, PySpark, TensorFlow, Scikit-learn, Streamlit, OpenAI

Product Skills: Agile Methodologies, A/B testing, Data Analysis (Python, SQL, Excel), LLMs
